Contract testing performed by a third party laboratory.

ND = not detected. The measured value was below the limit of detection. <LOQ = Values below quantification limit of 0.03 % or 300 mg/kg.

The expected measurement uncertainty varies with substance and concentration and can be assumed to be a maximum of 5 %.

For the calculations of the equivalent sums, the respective acid forms are multiplied by the factor 0.877 or 0.878 to conclude the equivalent amount of the neutral form.

Method of analysis: HPLC-UV-DAD
