Contract testing performed by a third party laboratory.

ND = not detected. The measured value was below the limit of detection of 0.01 % or 100 mg/kg. <LOQ = the measured value was below the limit of quantification of 0.02 % or 200 mg/kg

The expected measurement uncertainty varies with substance and concentration and can be assumed to be a maximum of 5 %.

For the calculations of the equivalent sums, the respective acid forms were multiplied by the factor 0.877 or 0.878 to conclude the equivalent amount of the neutral form.

Method of analysis: HPLC-UV (High Performance Liquid Chromatography – UV Detector).
